

## Ground Review Preparation

1. Cross-country flight planning. Plan a cross-country flight to Moose Creek Idaho and back. If you use a computer generated flight plan be prepared to prove that the flight plan is correct.
2. Airspace. (To include cloud clearances, visibility, equipment requirements, pilot requirements.)
3. 61.56 Recent flight experience.
4. Duration of medical.
5. Privileges and limitations of the certificate he/she holds.
6. Applicable parts of CFR 91. (Subparts A, B, D, E)
7. Weather. (Text and Graphic weather, effects on aircraft performance and an understanding of weather systems.)
8. Sectional, Terminal, and WAC charts.
9. NOTAM's, and TFR's.
10. Facility directories.
11. Performance, limitations and systems of the aircraft to be flown.
12. Weight and balance and the adverse effects of forward and aft cg loading.

Note: Items 2, 7, 8, 9, and 10 will be checked during the examination of the cross-country.
